BIOGRAPHY

I'm an energetic and diligent Compositor with an eye for pixel perfection. During my last years, I have been working with high-end visual effects houses in London combining the experience of working in films, tv-shows and commercials.

Working on these subfields gave me the ability to solve different types of shots proposing distinct solutions. I reshuffled my approaches and merged all the knowledge improving my workflow and technical proficiency in digital compositing.

As an information-seeker, I am always eager to push my boundaries facing each project as a new challenge, opportunity to learn and self-development.

Believing that quality is of utmost importance, my major goal is to propose creative solutions for different challenges by harnessing my multidisciplinary skill set.
